Touch Signage

QM32C-T series

Customer engagement.
Elevated by touch

Deliver instant control for seamless customer guidance with the QM32C-T, a 32-inch touch display supporting up to 10-point multi-touch and anti-glare clarity. Its intuitive Home UI and Center IR make everyday operation simple and efficient, helping businesses create engaging, touch-enabled experiences in customer service, wayfinding, and interactive signage applications.

Key features

Interactive Touch Panel

Enable smoother interaction with a responsive 10-point capacitive touch panel. Customers can easily navigate menus, select products, or explore content—enhancing engagement in limited-space environments.

Anti-Glare

Designed with an anti-glare panel and optimized haze level, the QM32C-T helps reduce reflections from indoor lighting and daylight. In bright retail spaces or open offices, your content stays clear and easy to read.

Home UI

The upgraded Home UI brings commonly used settings and sources together in a single, easy-to-access screen. Whether adjusting display inputs or managing device settings, users can navigate key tools faster—without digging through multiple menus.

Center IR

Each display receives IR signals directly to the panel, allowing simple remote control with no IR receiver cable extension needed when mounted.

Samsung VXT

The cloud-based Samsung VXT brings together content management and remote device management capabilities. Remotely manage hardware settings and troubleshoot issues while creating and deploying content effortlessly with no previous training needed.

* VXT must be purchased separately and the feature's availability may vary by region.
* Actual UI may differ and is subject to change without notice.
